Namely API Python Client

Release 0.0.1

Vadym Khodak

Sep 21, 2021

RESOURCES

1 Installation **3**

2 Get started **5**

3 License **7**

3.1 profiles 7

3.1.1 Methods 7

Python Module Index **9**

Index **11**

Non-official Python client for Namely.

Learn more about Namely API here.

CHAPTER

ONE

INSTALLATION

```
pip install namely
```

CHAPTER

TWO

GET STARTED

```python
# Import Namely API Client
from namely import Client

# Initialise Namely API Client
client = Client("https://<your-domain>.namely.com/api/v1/", "<your-namely-api-token>")

# Get all profiles
get_all = client.profiles.get_all(multi_threading=False)

# Get profile by Namely id
person = client.profiles.get("<person-namely-id>")

# Get my Namely profile
me = client.profiles.get_me()

# Get all profiles by filters
mikes = client.profiles.filter(first_name="Mike")

# Update profile by Namely id
profile_to_update = {"user_status": "inactive"}
updated_profile = client.profiles.update("<person-namely-id>", profile_to_update)

# Create Namely profile
new_profile = {
        "first_name": "John",
        "last_name": "Smith",
        "user_status": "active",
        "start_date": "2019-01-01",
        "email": "work@email.com"
        }
created_profile = client.profiles.create(new_profile)
```
